

PHOTON LINES

Optical solutions

Environmental Policy

Photon Lines specialises in the sale and distribution of photonic equipment.

The management and all who work at Photon Lines are committed to the protection of the environment and the prevention of pollution.

Photon Lines commits to fulfil our compliance obligations with regard to all applicable legal and other requirements that relate to the operational context of the business.

Photon Lines Ltd seeks to minimise waste, promote recycling, reduce energy consumption, reduce harmful emissions and where possible work with suppliers who themselves have sound environmental policies.

An essential feature of the environmental management system is a commitment to continual improvement to improve and enhance our environmental performance. This is achieved by setting annual environmental improvement objectives and targets which are regularly monitored and reviewed. The objectives and targets are publicised throughout the organisation and all staff are committed to their achievement.

In order to ensure the achievement of the above commitments, the organisation has implemented an environmental management system which satisfies the requirements of BS EN ISO14001:2015.

This policy and the obligations and responsibilities required by the environmental management system have been communicated to all employees and persons working on behalf of the organisation. This policy is available to the public on request.
