

Environmental Policy

Photon Lines Ltd specialises in the sale and distribution of photonic equipment.

The management and all who work at Photon Lines are committed to the protection of the environment and the prevention of pollution.

We are committed to fulfil our compliance obligations with regard to all applicable legal and other requirements that relate to the operational context of the business.

We seek to minimise waste, promote recycling, reduce energy consumption, reduce harmful emissions and where possible work with suppliers who themselves have sound environmental policies.

An essential feature of the environmental management system is a commitment to continual improvement and enhancement of our environmental performance.

In order to ensure the achievement of the above commitments, the organisation has implemented an environmental management system which satisfies the requirements of BS EN ISO14001:2015.

This policy has been communicated to all employees and persons working on behalf of the organisation. This policy is available on request.
